FoldCheck Inspection Report

Generated: October 16, 2026 at 5:41:26 PM
Time zone: America/New_York
Report ID: D2649760-230F-4C9D-84FF-8F471BBEDE60

Device Information

Model	iPhone Duo (Simulator)
Type	iPhone Duo
iOS Version	iOS 27.1
Storage	238.42 GB

Inspection Summary

Status	Attention
Score	94/100
Duration	4m 0s
Inspection date	October 16, 2026

Test Results

Touch Grid (Outer) — Pass

Outer display

Coverage	100% (240/240)
Max touches	5

Sample data / 示例数据

Touch Grid (Inner) — Pass

Inner display

Coverage	100% (240/240)
Max touches	5

Sample data / 示例数据

Pixels & Uniformity — Pass

Issues marked	0

Sample data / 示例数据

Crease Visibility — Pass

Crease Rating	3 / 5 (max 3)

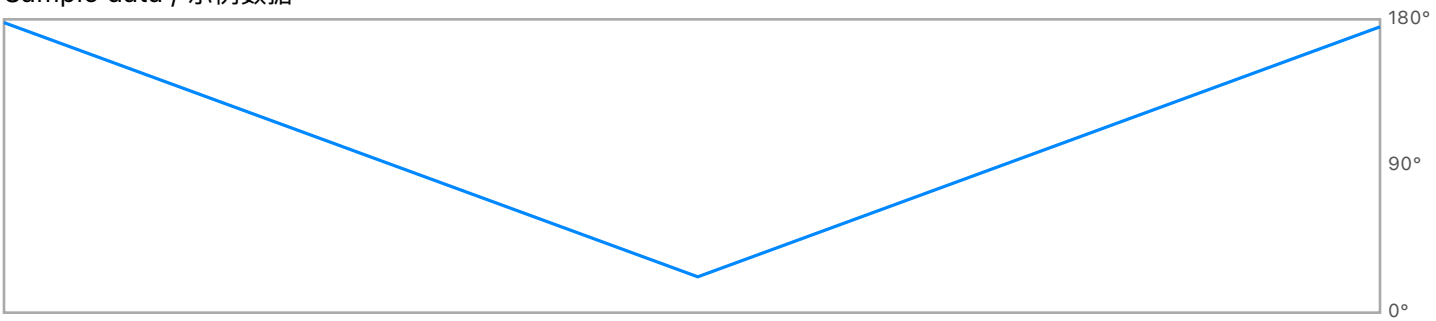

Sample data / 示例数据

Hinge Sweep — Attention

Continuity	100%
Max Gap	18°
Observed range	20°–178°
Sample Rate	30 Hz

Jitter at rest 0.4°

Sample data / 示例数据

Cameras Skipped

Sample data / 示例数据

Audio Skipped

Sample data / 示例数据

Touch ID Unavailable

Sample data / 示例数据

Sensors & Haptics Skipped

Sample data / 示例数据

Buttons Skipped

Sample data / 示例数据

Digital Signature

Development build (unsigned)

Key Fingerprint: c2153cb676fa1496

SHA-256: 3e0463fa2960a161559682a5cf191ff1fb5b8303ee76221a721fccf4154da00c

Open FoldCheck › Verify and import this PDF to check its embedded signed data, or scan the QR to check the signature only. Compare the signed results with the visible pages; the full PDF file is not covered by the signature.

DISCLAIMER: This report is a user-generated inspection snapshot created by FoldCheck. It is NOT an official certification from Apple or any authorized service provider. The digital signature checks only the embedded report data signed by this FoldCheck installation. It does not cover the entire PDF file or authenticate the device clock; compare the signed data with the visible pages. It does not verify device authenticity, ownership, or repair history. FoldCheck cannot access battery health, cycle counts, serial numbers, or lifetime fold counts. The fold counter tracks only folds observed while the app was running in the foreground. Hinge test results reflect continuity and consistency of angle readings, not absolute mechanical accuracy. Use this report as supplementary information only.
